## PROJECTS

---

### **Cloned Udemy**

I built a fully responsive website similar to Udemy using React and Bootstrap. The design focuses on a smooth user experience, like a real online learning platform. Key features include course listings, filtering options, and easy navigation, making it feel like a real e-learning site.

### **Food Ordering App**

I created a complete food ordering app using Angular, PHP, and MySQL. The app includes features like menu displays, order management, and a responsive design for a smooth user experience. I set up a MySQL database to manage user orders and inventory, and used PHP for server-side functions.

## COMMUNICATION

---

I have strong communication skills in English, both written and verbal, and excel at collaborating with team members. I can simplify complex technical details for easy understanding and actively engage in group discussions to contribute meaningfully.
